Terms of business for the provision of suspensions from the hall ceiling

1. Safety

1.1 For reasons of security are following suspensions **not allowed**:

- Suspensions of stand components
- Securing of stand components or exhibits (they have to be safe at their own)
- Suspended constructions with a fixed or non-positive connection to the hall floor

1.2. The constructions of suspension could only the company change, which have installed them. Changes at the constructions of suspension which are handed over are not allowed.

1.3. The use of lifting devices (for example chain hoist) is mandatory to clear with SAM PRODUCTION GmbH.

1.4. Regarding the installation of suspending devices are the following safety regulations to be noted: DGUV requirement 1 (general requirements), DGUV requirement 17 (event and production sites for scenic presentations), DGUV requirement 54 (winching, lifting and pulling devices) and the Assembly Area Ordinance for Germany.
(Please note the information from the leaflet of attachment equipment and IGVV (SQP1 – Trusses and SQP2 – Electric Chain Hoists))

Please note: rope end connections for lifting

- with wire rope clamps DIN 741 (so-called „Frösche“) are **not allowed**
- have to be DIN 56 921-11 (annex - DGUV requirement 17)

2. Suspensions from the hall ceiling – Important information

2.1. The exhibitor get a fixing point at the requested position above and within the exhibition area by ORTEC Messe und Kongress GmbH or the provider of them, if it fits with the constructional prerequisites. Please note: The suspended construction only could be in the exhibition area. ORTEC Messe und Kongress GmbH check the possibility of the realisation of the requested fixing points in consideration of the documents submitted.

2.2. Suspension from the hall ceiling can only be executed by contracting parties of ORTEC Messe und Kongress GmbH.

2.3. Every used suspension point at the construction of the hall ceiling only can be loaded of 100 kg vertical. The suspended weights are max. 5 Kg / m² exhibition area. Suspensions for larger loads only on demand (the cost for the planning will be put on an invoice). Is the requested fixing point not vertical below a suspension point will the fixing point be constructed with a connection of two or three suspension points. The end of each fixing point is one "O-Ring". Damaged material will be put on an invoice for the exhibitor.

2.4. The exhibitor is required to fix the suspended devices (Decoration, headlights, sonication, banner, flags etc.) or the designated service partner of ORTEC Messe und Kongress GmbH could execute it. Fixing devices for suspended material are not included. If necessary, it could be rented at SAM PRODUCTION GmbH.

2.5. The electric main connection for lighting has to be ordered separate.

2.6. Additional Equipment: The power supply for the lighting comes from the hall floor. The power supply from the hall ceiling is possible on demand and shall presuppose to assume the additional costs.

3. Submitted documents, order deadline

3.1. For the processing of the order are sketches of the side view and the floor plan of the exhibition area with the projection of the fixing points necessary (ISO A3, scale 1:100 or 1:50). The total weight of the suspended construction, the distance of the fixing points to the edge of the stand and the level above the hall ceiling has to be registered in the sketches too. Please sign in a north pointer or the neighbouring stands. Please let us know on which date you need your fixing points. If there is no altitude reading, you get the fixing points on a level of 6 meter above the hall floor.

3.2. We need the documents for preparation until 3 weeks before the official installation day. If the order is too late, there is no guarantee to provide suspensions.
SAM PRODUCTION GmbH reserve the right to calculate an addition of 25% for belated orders. Orders depend on the availability and are at the first day of installation conditionally. Realisation depends on the total load and on the possibilities locally.

3.3. Cancellations are until 3 weeks before the first day of installation possible. If there is a later resignation will the services are calculated. The service will be calculated when the service has already be done too. The same applies when there are other services ordered since the first time.

3.4. In addition apply the general contractual terms for exhibitor's services of ORTEC Messe und Kongress GmbH. Please note the technical requirements for banner on the following page.

Technical requirements for suspended banner

General requirements

- Suspensions for advertising media have to be A1 fire protection classification - DIN 4102 or EN 13501 – non-flammable.
- The maximum weight of the advertising media is 20kg.
- Your banner system has a mounting rod, eyelets and/or guy.
- The provisioned guys have to be A1 fire protection classification - DIN 4102 or EN 13501 – non-flammable (e.g. chain, steel rope).
- Suspension devices only could be charged with the 0.5-fold worth of their sustainability given by the producer.
- The technical requirements (state of the art) have to be followed.
- The maximum wide of the banner is 2m. If your banner is wider than 2 m, please contact us.
- Please let us know how high your banner is. We check the possibility of realisation regarding to the ceiling height.
- Rope clamps („Frösche“) are not allowed.
- If your banner has **no** fixing devices, it has to be configured like:
 - Mounting lug
 - Lug at least 5,5cm diameter
 - Maximum wide of the banner: 2m
 - Loops
 - Loops at least 5,5cm diameter
 - Maximum wide of the banner: 2m
 - Banner with eyelets
 - Inner diameter of the eyelets at least 6mm diameter
 - Maximum wide of the banner: 2m
